IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: James et al.

Serial No.: Not yet assigned; based on PCT/GB00/00760

Filed: Herewith (8/31/01)

For: Culture of Mycobacteria

Preliminary Amendment

Assistant Commissioner for Patents Washington, D.C. 20231

Sir:

Applicants respectfully request that the sapplication being filed herewith be amended as follows.

Paragraph beginning on line 5, page 4

Al

Accordingly, a first aspect of the invention provides a method of culture of mycobacteria, comprising culturing said mycobacteria, in batch <u>fermenter culture</u> or continuous culture, with agitation and in the presence of <u>at least 0.1%</u> (v/v) detergent. Sufficient detergent <u>is present</u> so that a substantially homogenous suspension of cells is maintained.

Paragraph beginning on line 10, page 4

A2

Preferably, the method of the invention comprises growing said mycobacteria in batch <u>fermenter culture</u> or continuous culture, at a temperature of 35°C +/- 10°C, at a dissolved oxygen tension of at least 1.0 percent, at a pH of 6.9 +/- 0.9 [and with agitation in the presence of sufficient detergent to maintain a substantially homogenous suspension of single cells].

Paragraph beginning on line 4, page 8

A3

The invention further provides, in a second aspect, a growth medium for culture of mycobacteria, comprising:

- a carbon source;
- a mitogen;
